

**PLÁSTICOS JUREMA**  
**INDUSTRY AND COMMERCE**

# HISTORY

The Jurema Group started its activities in 1980 with a focus on flexible plastic packaging, serving product and service companies in various segments.

40 years in the market, it is located in the city of Carapicuíba, in its own building, in an area of approximately 5.000 m<sup>2</sup>.

Is the pionner in the development of packaging with zip closure and advanced packaging solutions for the export of foods products.

“The goal of Plásticos Jurema, is to produce and sell flexible plastic packaging, seeking customer satisfaction through continuous improvement of quality and environmental management systems, protecting it through pollution prevention making rational use of non-renewable natural resources, wastes correctly and in compliance with the legislation applicable to its activity.”

## MISSION

“Produce and commercialize flexible plastic packaging that meets customer expectations with excellence in quality, punctuality, competitive price, always seeking to preserve the environment.”

## VISION

“To be an industry with recognized quality in the production of flexible plastics, with excellence in customer service, and without causing any type of risk to the environment.”

# ZIP LOG

**FOR THE FOOD INDUSTRY**

**FOR CLOTHES**

**MISCELLANEOUS USE**

The modernity of the packaging speaks a lot about the product it contains. A ZIP closure package expresses its concern to innovate, to always offer the best. Its product makes a good impression at first sight and conquers consumers. It is your passport to new markets.

Few packages protect the product like the bag with ZIP closure, and unlike any other, only the ZIP continues to protect after opening, just close again to conserve the life of the product, making life easier for the consumer. It is great for hygienic and many other products, and great for you who win a new sales pitch too.

# EMBOSSED COILS

The embossed coil of Plásticos Jurema is ideal for rubber isolation and separation of layers (Tire and other), in the production process in the automotive industry. Are polyethylene coils with texture: Embossed trunk-pyramidal, pyramidal e diamond. Supplied with a width of up to 1,70 meters, in different colors and thicknesses, according to customer's specification. This range of choices allows the customer to have quality material adjusted to their expectations.

# COILS AND MISCELLANEOUS PACKAGING

Coils and printed bags, customized, have the protection and the ideal visual presentation of your products, with your brand in evidence with your customer.

# MAIN CLIENTS

# PRODUCTIVE CAPACITY

The Plásticos Jurema has 5 manufacturing processes available in its factory track. They are: Extrusion, Printing, Embossing, Rewinding, Finishing.

With own building of 4970 m<sup>2</sup>, presents a well defined lay-out, wich ensures agility and flexibility to the production process.

We have specialized professionals and advanced technology equipment to deliver quality and reliability to our customers.

The total production capacity is around 500 tons per month, the main raw material in the process being Polyethylene.

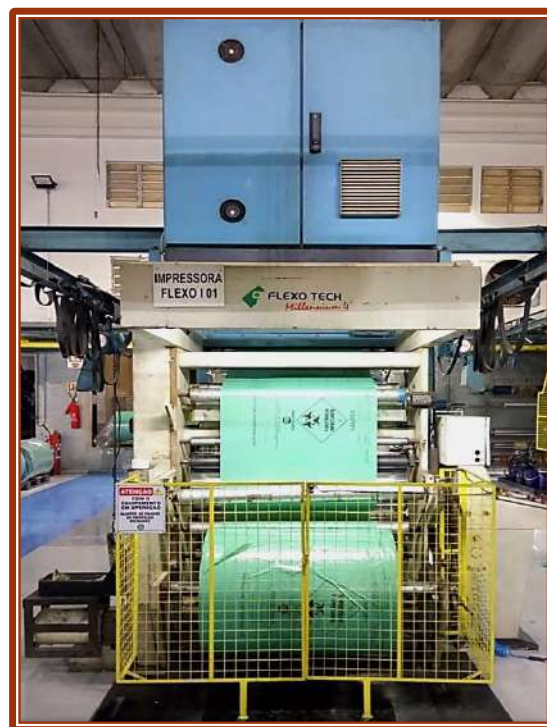

# EXTRUSION

The extrusion sector has 4 extruders, 1 coextruder, 2 monolayers and 1 oriented to the production of ZIP closure. **The production capacity is 500 Ton/Month.**

# PRINTING

The Printing sector has 2 printers. One prints up to 4 colors, while the other prints up to 6 colors. **The Printing capacity is 250 Ton/Month.**

# EMBOSSER

The embosser sector has 2 embossers. The objectives of the process is to add a differentiated texture to the plastic for application during the manufacture of rubber. **Embossing production capacity is 150 Ton/Month.**

# REWINDER

The rewinder sector has 2 rewinders. The purpose of the process is to reel coils to meet customer specifications, such as width and/or opening. **The production capacity is 100 Ton/Month.**

# FINISHING

The finishing sector has 6 cutting and welding machines. It is in this process that the coils are transformed into bags. **The production capacity is 200 Ton/Month.**

# EXPEDITION

The expedition sector has ample physical space, with a handling capacity and storage of 600 Ton of material. **There are also the availability of 2 own trucks for delivery in São Paulo.**
